## FALSE FLOOR (Barcelona)

Part of a series of False Floors this piece was built in a large space at MACBA, (museu d'arte Contemporaneo), as part of the international exhibition entitled MIRADES (sobre el museo) - or looking beyond the museum walls. Its raked surface could be walked on by visitors, who were able to look through the roughly hacked openings to see and hear water flowing beneath.

water, floorboards. 10 x 11 x 0.70 m.
